OK Cancel

6. We suggest you "copy / paste the license key for this section.

Once the keys have been installed, click OK (Check the end of the year!)

You now have Full dealer BUDS diagnostic system!

IMPORTANT NOTE

We have found on some screen setups the "OK" box highlighted above is not visible at the bottom of the screen! This may be due to resolution or computer settings but BUDS cannot be finished and unprotected until the "OK" button is clicked after entering the key code!

We have found that moving the task bar to a side position usually exposes the top of the button.

But in extreme cases we have had to resort to changing the screen settings temporarily to flip the screen settings temporarily to flip the screen 90 degrees on its side and then this allows the button to be clicked!

Or

After clicking button "ADD" necessary press the TAB key on your keyboard (TAB over CAPS LOCK) and press the ENTER key.

7. If you have installed multiple versions of BUDS, you must repeat steps 5 and 6 for each program.

IMPORTANT!

The license key is valid for installation in 12 hours.

To install the license key after 12 hours, please contact with me.

This option may be necessary after you reinstall Windows or install BUDS to another computer.
